EARLY GEORGE STREET >>>> OF GENERAL INTEREST

SANDS and MC DOUGAL DIRECTORY

In 1805, there appear to be two houses in George Street .....
one wood, owned by a Mrs Barnett, and
one brick, occupied by “Agent” I. Coughlin.

In 1885, a wood house in George Street is listed as owned and occupied by James O’Connor. Houses were not numbered at that time.

* Could James O’Connor have been the father of Architect, P.J. O’Connor .... who designed Bradoc House ?

In 1890, there appeared to be three blocks of land between 40 and 20 George St.

* Owned by Archibald Davidson	22 ft. wide	165 ft. depth
* Owned by William Jones	44 ft. wide	165 ft. depth
* Owned by Archibald Davidson	66 ft. wide	165 ft. depth

In 1900, the depth of these blocks increased to 187 ft. .... presumably as a result of draining the small creek at the rear of these properties ?
